

Children and Family Court Advisory and Support Service

Performance report: July 2013

The July 2013 performance report is the fourth report for the 2013-14 year, and details Cafcass' performance against Key Performance Indicators, alongside significant supporting information such as the demand placed on the organisation's services.

Cafcass is exceeding the target in all four KPIs on a national basis in the year to date, evidencing the speed and completeness in allocating cases and the timeliness with which private law reports are filed. There is also a new fifth KPI introduced this year, focussing on the proportion of public law care cases where Cafcass is cited as the main reason for an adjournment, which will commence recording from September 2013.

Cafcass continues to see record levels of demand in both public and private law. Record annual totals were received in 2012-13, and between April and July 2013 both law types have increased compared to the same period last year. In particular, private law has seen a sharp increase, with over 5,000 cases received in May 2013 which is the highest ever recorded for an individual month. In public law, the reduction in the stock of open cases is indicative of shortening of average case durations and the quickening of internal administrative processes through effective use of management information. In private law, the stock of open case has risen gradually since April 2013, but at a much lower level than that of the incoming case demand.

The key issues that Cafcass will monitor during the 2013-14 year will include the impact of and adaptability to, an increase in litigants in person in private law cases, due to legal aid reform, and the upcoming changes to be introduced in the revised Public Law Outline.

Key trends

- KPIs 1-4 exceeded target levels for the year to date.
- Care application demand between April and July 2013 has increased by 2% (76) compared to the same period last year.
- The stock of open care cases has reduced by 21% (2,143) compared to July 2012.
- Private law case demand between April and July 2013 has increased by 22% (3,336) compared to the same period last year. Over 5,000 cases were received in May 2013, the highest figure ever recorded for an individual month.
- The stock of open private law cases has reduced by 0.4% (101) compared to July 2012.

Cafcass uses a red / amber / green banding to indicate the level of performance against the Key Performance Indicators

Key Performance Indicator (KPI)	Target	Year to date (YTD) Performance	Trend
1: Public care cases allocated to Children's Guardian at month end	97%	99.9% (Green)	Stable (last month YTD: 99.9%)
2: Average working days to allocate Children's Guardian to care case	<3 working days	0.4 days (Green)	Stable (last month YTD: 0.4 days)
3: Private law cases allocated to Family Court Adviser at month end	97%	99.3% (Green)	Stable: (last month YTD: 99.3%)
4: Private law section 7 reports filed by agreed date	97%	98.5% (Green)	Declining: (last month YTD: 98.6%)
5. Public law care cases where Cafcass is cited as the main reason for an adjournment	To be recorded from September 2013		

Christine Banim – Service Director

Andrew Thorpe – Senior Research & Data Analyst

Public law - KPI 1: Public law care cases allocated to Children's Guardian at month end

Target:	97%
YTD Performance:	99.9% (Green)
Trend:	Stable (last month YTD: 99.9%)

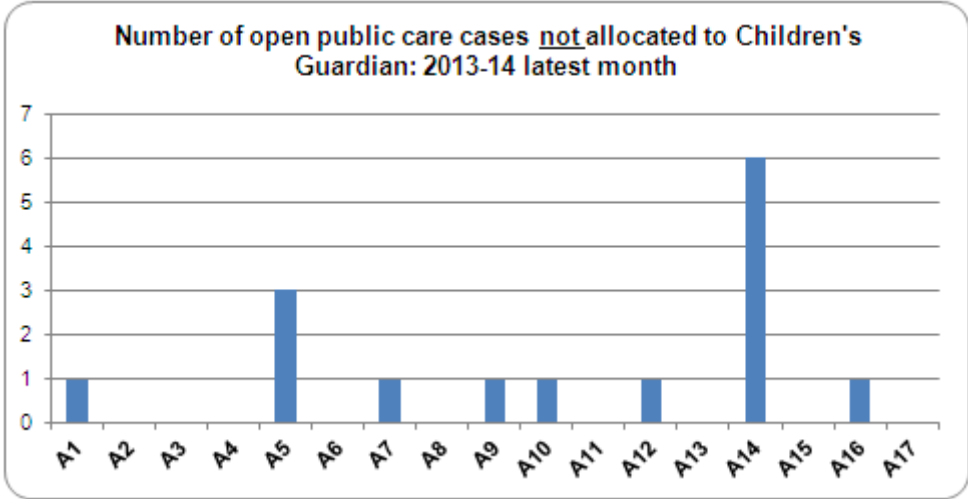

This indicator measures all public law care cases, received and ongoing, as a snapshot at the end of the month. All public law care cases should be substantively allocated to a children's guardian upon receipt, and should remain allocated until the case is closed.

For this measure a year to date average is reported to build a picture of performance for the year as it progresses. Performance for this indicator has increased slightly on the previous month's year to date figure of 99.8%.

Nationally, Cafcass has exceeded the 97% target for this KPI in each month since January 2011. The below graph shows the further improvement that has been made in driving down the proportion of open cases which are not allocated to a Children's Guardian at month end.

The following graph displays the number of open cases not allocated to a Children's Guardian in the latest month, by service area.

Best performance: Six service areas are achieving 100% for the year to date.

Service area hotspots: All 17 service areas are exceeding the target of 97%, despite the continuing high levels in care application demand (see page 8 for further details).

Comparison to previous year: Year to date performance in July 2012 for this indicator was 99.7%.

Unallocated: At end of Jul-12 = 0 cases
 At end of Jun-13 = 0 cases
 At end of Jul-13 = 1 case

Duty: At end of Jul-12 = 18 cases
 At end of Jun-13 = 9 cases
 At end of Jul-13 = 14 cases

Of the 14 duty allocated care cases at the end of July 2013, 7 are at stage 1, defined as new cases which are yet to reach case management conference.

The full definitions of public law case statuses and stages can be seen on page 16 of this document.

Public law – Care workload stock

National	Jul-12	Aug-12	Sep-12	Oct-12	Nov-12	Dec-12	Jan-13	Feb-13	Mar-13	Apr-13	May-13	Jun-13	Jul-13

Unallocated	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%

Despite the record levels of incoming care applications in recent years, the current stock of open care cases has reduced by 21% (2,413 cases) compared to July 2012. This has helped to maintain the proportion of unallocated and duty cases at a minimal level.

There are a number of reasons for the difference between the 'stock' bar chart and the 'flow' graph:

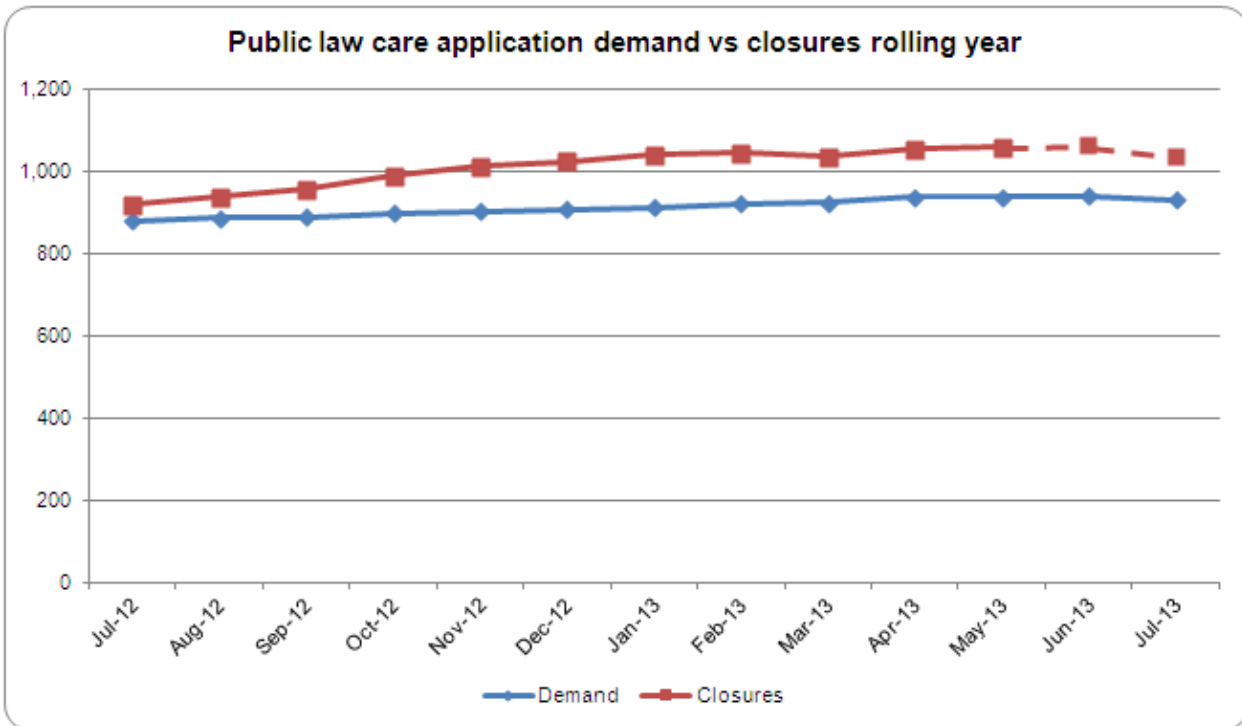

- Difference in the units of measurement. The stock bar chart shows current open cases while the flow graph shows incoming and outgoing applications.
- New care applications can be added to existing cases. This results in an increase in the care application demand shown on the flow graph but it has no effect on the number of cases shown in the stock bar chart.
- A care case can remain open even though all applications have been closed. This is due to factors such as awaiting the arrival of court orders and undertaking 'farewell work' with children. In this situation, the stocks bar chart will show no movements, but the closed application/s will feature among the closures on the flow graph.
- Linked to this, a care case can be closed (and disappear from the stock bar chart) some time after the application has been closed. Hence, the changes in the stock bar chart will not match the changes in the flow graph, as they happen at different times. For example, the current report now shows 991 care application closures in August 2012, while the performance report for August 2012 showed only 543 care application closures for the same month at that time.

Public law – Care workload flow

	Jul-12	Aug-12	Sep-12	Oct-12	Nov-12	Dec-12	Jan-13	Feb-13	Mar-13	Apr-13	May-13	Jun-13	Jul-13
Demand	995	987	879	956	957	863	971	1,004	935	918	981	850	871
Closures	1,198	991	1,097	1,218	1,202	982	933	952	1,018	1,074	1,121	963	881

NB. Care closures in the most recent two months are not all concluded due to closure procedures and awaiting court orders – illustrated by the dotted line on the graph.

	Jul-12	Aug-12	Sep-12	Oct-12	Nov-12	Dec-12	Jan-13	Feb-13	Mar-13	Apr-13	May-13	Jun-13	Jul-13
Demand	879	887	890	898	904	908	912	922	925	938	938	941	931
Closures	920	937	956	989	1,014	1,024	1,041	1,044	1,036	1,054	1,059	1,062	1,036

The above graph displays rolling year averages for care application demand and closures, as a supplement to the individual month figures. The rolling year average evens out the seasonal variations and helps to highlight longer term trends.

Public law – Non care workload

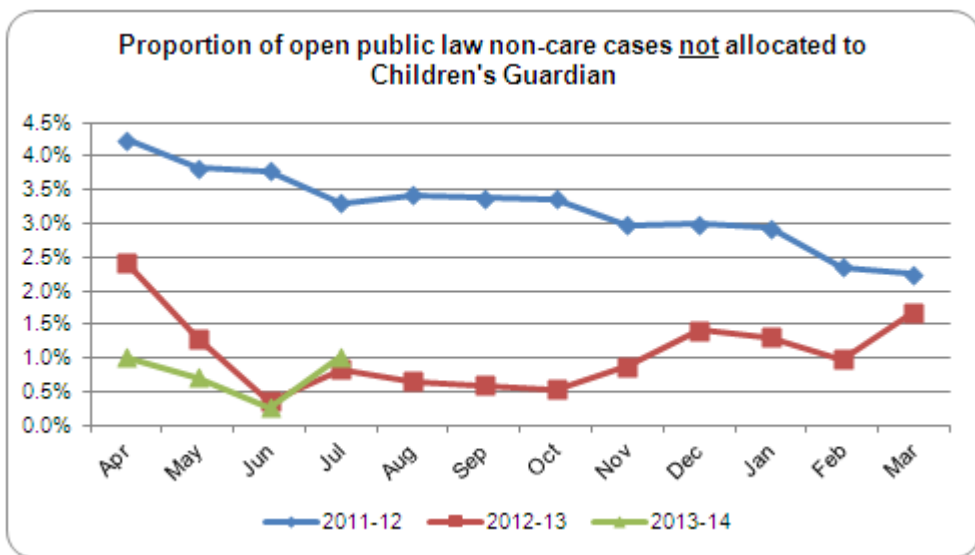

YTD Performance:	99.2%
Trend:	Declining (last month YTD: 99.3%)

As a supplement to care workload covered in KPI 1, this page details the workload status of the non-care public law cases, received and ongoing, as a snapshot at the end of the month. As the measure is not a KPI for Cafcass, hence there is no defined performance target level.

All public law cases should be substantively allocated to a children’s guardian upon receipt, and should remain allocated until the case is closed.

For this measure a year to date average is reported to build a picture of performance for the year as it progresses. Performance for this indicator has increased slightly on the previous month’s year to date figure of 99.0%.

Nationally, Cafcass has exceeded the 97% for this measure in each month since November 2011. The below graph shows the further improvement that has been made in reducing the proportion of open cases which are not allocated to a Children’s Guardian at month end.

The following graph displays the number of open cases not allocated to a Children’s Guardian in the latest month, by service area.

Best performance: Six service areas are achieving 100% in the year to date.

Service area hotspots: All 17 areas are at or above 97% for this measure

Comparison to previous year: Year to date performance in July 2012 was 98.8%.

Unallocated: At end of Jul-12 = 1 cases
 At end of Jun-13 = 0 cases
 At end of Jul-13 = 0 case

Duty: At end of Jul-12 = 13 cases
 At end of Jun-13 = 4 cases
 At end of Jul-13 = 16 cases

The full definitions of public law case statuses and stages can be seen on page 16 of this document.

Public law - KPI 2: Average working days to allocate Children's Guardian to care cases

Target:	<3 working days
YTD Performance:	0.4 days (Green)
Trend:	Stable (last month YTD: 0.4 days)

This indicator is a measure of the ability to allocate, on a substantive basis, a Cafcass Family Court Adviser or self-employed contractor as a Children's Guardian to all public law care cases within 3 working days from receipt of the application.

2011-12: In this year a total of 9,752 care cases were allocated to a Children's Guardian, at an average of 4.3 working days, a significant improvement on the previous year's average of over 20 working days. Performance stayed consistently at or below 5 working days in each month, and improved further in the second half of the year.

2012-13: In this year a total of 10,175 care cases were allocated to a Children's Guardian, at an average of 0.8 working days, furthering the progress made in the previous year. Aside from April and May, all subsequent months were below 1 working day.

2013-14 to date: Between April and July 2013, a total of 3,272 care cases were allocated to a Children's Guardian, at an average of 0.4 working days.

The following graph shows the average working days to allocate case cases in the year to date for each service area:

Best performance: Between April and July 2013, A2 allocated care cases to a Children's Guardian at an average of 0.2 working days. 13 other areas achieved an average of less than or equal to half a working day.

Service area hotspots: No areas are currently hotspots, all areas are meeting the target of less than 3 working days on average.

Public law – Care application demand

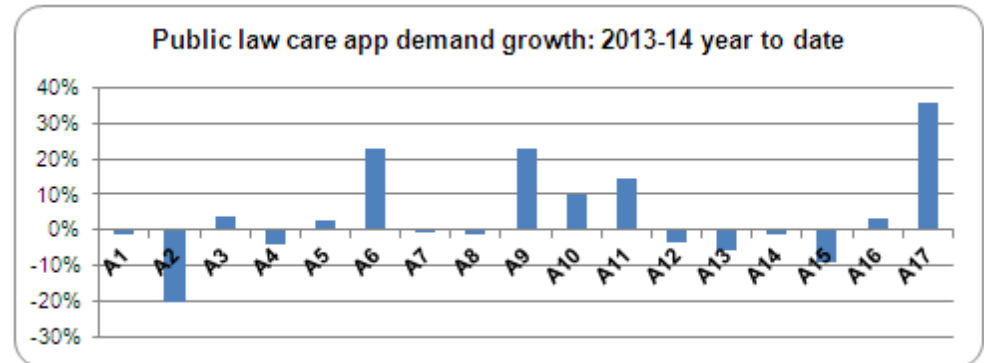

2011-12: Cafcass received 10,254 new applications in this year, an 11% increase on the 9,203 received in 2010-11. Applications received between and including May 2011 and March 2012 were the highest ever recorded by Cafcass for these individual months at this time.

2012-13: Cafcass received 11,093 new applications in this year, an 8% increase on the 10,254 received in 2011-12. Applications received during all months, except June, were the highest ever recorded by Cafcass for these individual months at this time, with the 1,002 applications received in February 2013 being the highest ever recorded for a single month. The comparatively lower demand in June 2012 is believed to be due to the lack of working days available due to the special bank holidays this year.

2013-14 to date: Cafcass received a total of 3,616 care applications between April and July 2013, a 2% increase on the 3,544 received in the same period last year. In the month of July 2013, 871 applications were received, a 13% decrease compared to July 2012.

The above graph displays rolling year average for care application demand, as a supplement to the individual month figures. The rolling year average evens out the seasonal variations and helps to highlight longer term trends.

Comparing April-July 2013 against the same period last year, 8 of the 17 service areas have seen an increase in care demand. The highest increase is in A17 (36% or 36 applications), with the greatest decrease in A2 (20% or 35 applications). Annex 4 on page 19 of this report displays the number of applications per 10,000 children by service area for each of the past five years.

Private law - KPI 3: Private law workload allocated at month end

Target:	97%
YTD Performance:	99.3% (Green)
Trend:	Stable: (last month YTD: 99.3%)

This indicator measures all private law cases received and ongoing, as a snapshot at the end of the month. It is expected that all private law cases will be allocated upon receipt, and that they will remain allocated, either on a duty or substantive basis, until the case is closed.

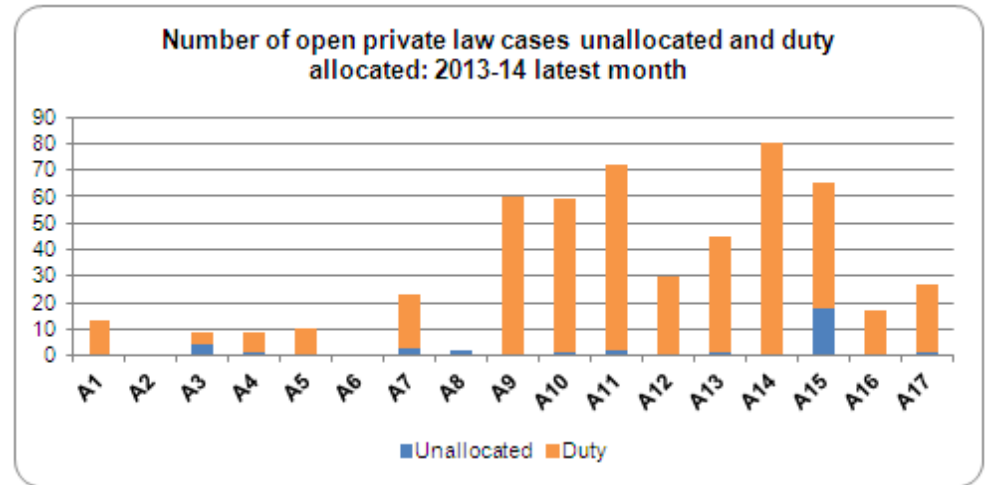

All private law cases received by Cafcass are inputted onto the Cafcass Case Management System (CMS) by the Cafcass Intake Team (CIT). Practitioners at the CIT screen each case before transferring to the appropriate local Cafcass office for allocation to a Family Court Adviser.

For this measure a year to date average is reported to build a picture of performance for the year as it progresses.

Nationally, Cafcass has exceeded the 97% target for this KPI in each month since October 2010. The below graph shows how the proportion of open cases which are not allocated at month end has been maintained at a consistently low level.

The following graph displays the number of open private law cases that were unallocated and duty allocated at the end of July 2013, by service area.

Best Performance: Seven areas are achieving 100% for the year to date.

Service area hotspots: No areas are currently hotspots. All service areas are within or higher than the green band of above 97% for the year to date.

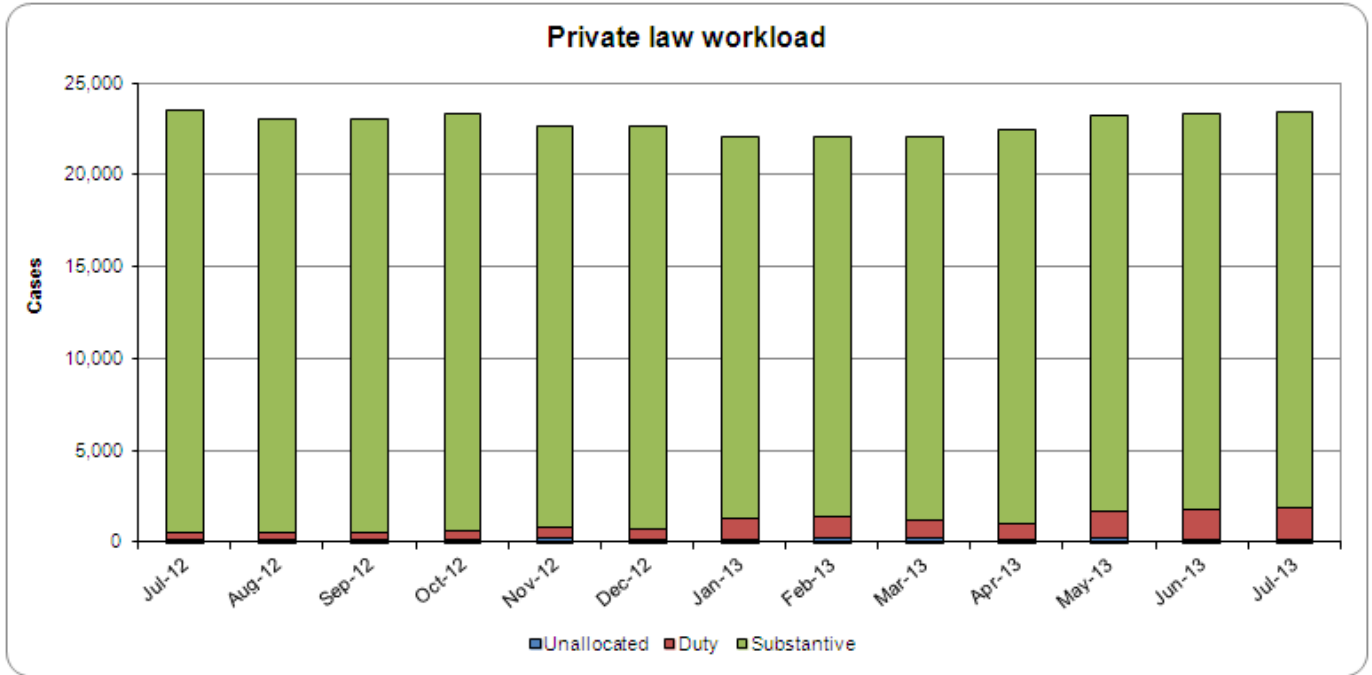

Unallocated: At end of Jul-12 = 104 cases (89 at CIT)
 At end of Jun-13 = **103** cases (79 at CIT)
 At end of Jul-13 = **117** cases (84 at CIT)

Duty: At end of Jul-12 = 442 cases (17 at CIT)
 At end of Jun-13 = **1,620** cases (1,077 at CIT)
 At end of Jul-13 = **1,752** cases (1,264 at CIT)

The increase in the number of duty allocated cases at CIT is due to the sharp rise in private law case demand this year to date (see page 13). These cases are in the process of being screened by CIT practitioners prior to transfer to local offices. CIT has recruited additional staff to help respond to the heightened demand and maintain performance levels.

Private law – Workload stock and flow

The stock of open and ongoing cases has been sustained at around the 22 – 23,000 level over the past 12 months, with the proportion of unallocated cases being consistently at or below the 1% mark. This has been achieved despite the continuing increase in demand, due in part to the case closure levels being above or on par with the demand

National	Jul-12	Aug-12	Sep-12	Oct-12	Nov-12	Dec-12	Jan-13	Feb-13	Mar-13	Apr-13	May-13	Jun-13	Jul-13

Private law - KPI 4: Section 7 reports filed by agreed date

Target:	97%
YTD Performance:	98.5% Green
Trend:	Declining: (last month YTD: 98.6%)

Since 1 April 2010, Cafcass has recorded the four distinct types of welfare report that can be ordered under section 7 of the Children Act 1989: multiple issue, single issue, risk assessment, and wishes & feelings. These categories of report are set out in schedule I of the President’s Private Law Programme 2010. This indicator measures the rate of each of the four types of section 7 report that are filed by the date agreed between the Court and Cafcass.

Nationally, Cafcass has exceeded the 97% target for this KPI in every month since March 2011. The below graph shows the proportion of section 7 reports which have missed the agreed filing date in each month.

2012-13: In this year, Cafcass filed a total of 22,855 reports at an average of 12.3 weeks, with 99.2% (22,662) filed by the agreed date. Performance declined slightly in the second half of the year, but still exceeded the target and reported an overall improvement on the previous year.

2013-14 to date: Between April and July 2013 Cafcass filed a total of 8,078 reports at an average of 11.7 weeks, with 98.5% (7,960) filed by the agreed date.

Best performance: Six areas are achieving 100% in the year to date.

Service area hotspots: No areas are currently hotspots. All areas are exceeding 95% in the year to date.

The following graph shows the average filing time in weeks for all section 7 reports filed, showing a gradual decrease over the past few years.

Private law - KPI 4: Section 7 reports filed by agreed date – Proportion of reports extended

All section 7 reports which Cafcass have been ordered to produce by the Court will have a filing due date, which will usually be set for a date shortly before the hearing at which the report will be considered. In the period between the requesting of the report and the specified filing date Cafcass may request that the Court agree an extension to the original filing date. Such requests are usually approved, and for the purpose of measuring performance in relation to KPI 4, the achievement of the extended filing date is used.

2013-14 to date: Between April and July 2013, Cafcass filed a total of 8,078 section 7 reports, with 28% (2,229) being extended. This is a favourable comparison to the same period last year, in which 40% of filed reports were extended.

The following graph displays the proportion of filed section 7 reports in 2013-14 year to date which were extended, by service area.

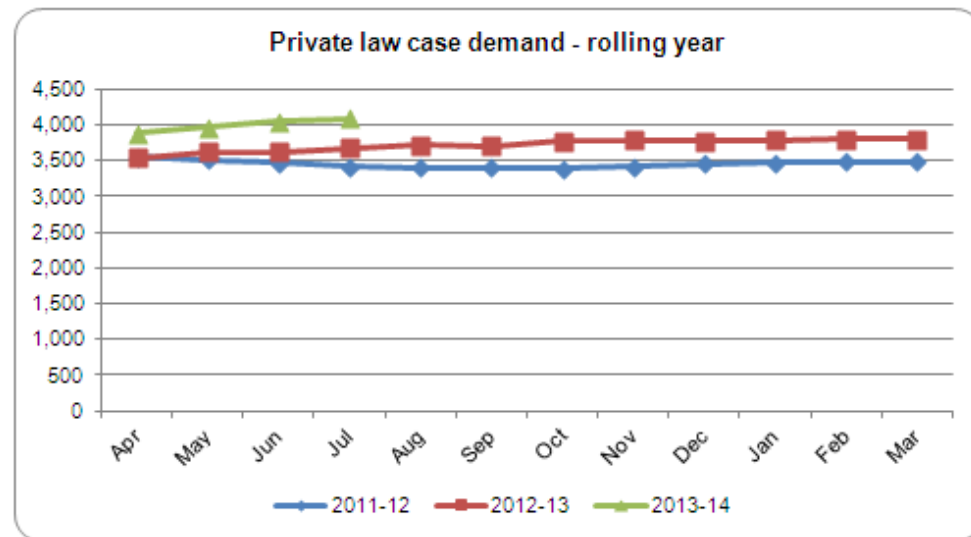

2011-12: In this year a total of 24,421 section 7 reports were filed, with 42% (10,308) being extended. There is an evident decreasing trend as the year progressed, dropping from a high of 48% in May 2011 to 38% in March 2012.

Between April and July 2013, a total of 316 section 7 reports were filed in A17, with 37% (117) being extended: this is the highest rate of all service areas. Nine other areas have an extension rate higher than the national average.

2012-13: In this year, a total of 22,855 section 7 reports were filed, with 35% (8,076) being extended. The decreasing trend has continued from the previous year, dropping from 40% in April 2012 to 31% in March 2013.

In the same period, a total of 231 section 7 reports were filed in A13, with 17% (40) being extended: this is the lowest rate of all service areas. Six other areas have an extension rate lower than the national average.

Private law – Case demand

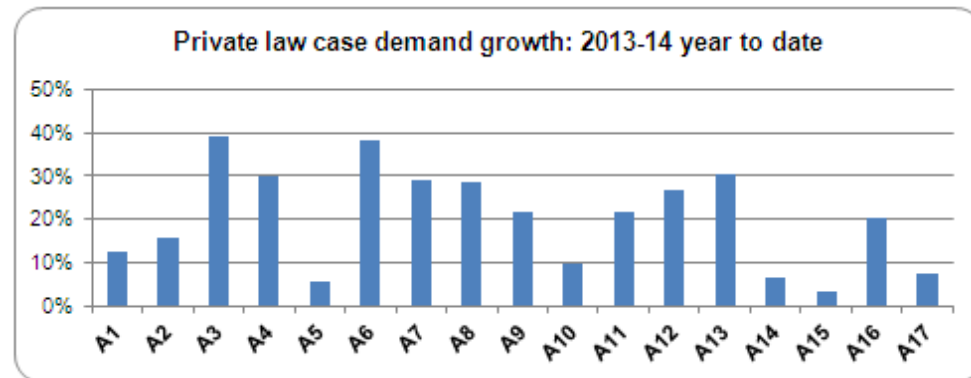

2011-12: Cafcass received 41,806 new private law cases, a 4% decrease on the 43,637 received in 2010-11. In the first quarter demand fell sharply, in part due to the implementation of Practice Direction 3A of the Family Procedure Rules 2010, the aim of which is to resolve less complex cases away from the courts, through Mediation Information and Assessment Meetings (MIAMs). In the second half of 2011-12 new case demand had returned to and exceeded previous levels, with case demand in November, December, January, and February being the highest ever recorded by Cafcass for those individual months at that time.

2012-13: Cafcass received 45,682 new private law cases in this year, a 9% increase on the 41,806 cases received last year, and represents the highest ever annual total received by Cafcass. Case demand in May, August, October, November, January and February have been the highest ever recorded by Cafcass in those individual months at that time.

2013-14 to date: Cafcass received 18,192 private law cases between April and July 2013, a 22% increase on the 14,856 received in the same period last year. Cafcass received 5,018 cases in May 2013, this is the highest ever for an individual month on record.

The above graph displays rolling year average for private law case demand, as a supplement to the individual month figures. The rolling year average evens out the seasonal variations and helps to highlight longer term trends.

Comparing April-July 2013 against the same period last year, each of the 17 service areas has seen an increase in private law demand. The highest increase is in A3 (39% or 349 cases), with the smallest increase in A15 (3% or 71 cases).

Private law – Further work demand

Section 7 Reports

Where the courts request further work by Cafcass, this can take one or more of a number of forms – the most usual type of work is the preparation of a section 7 report.

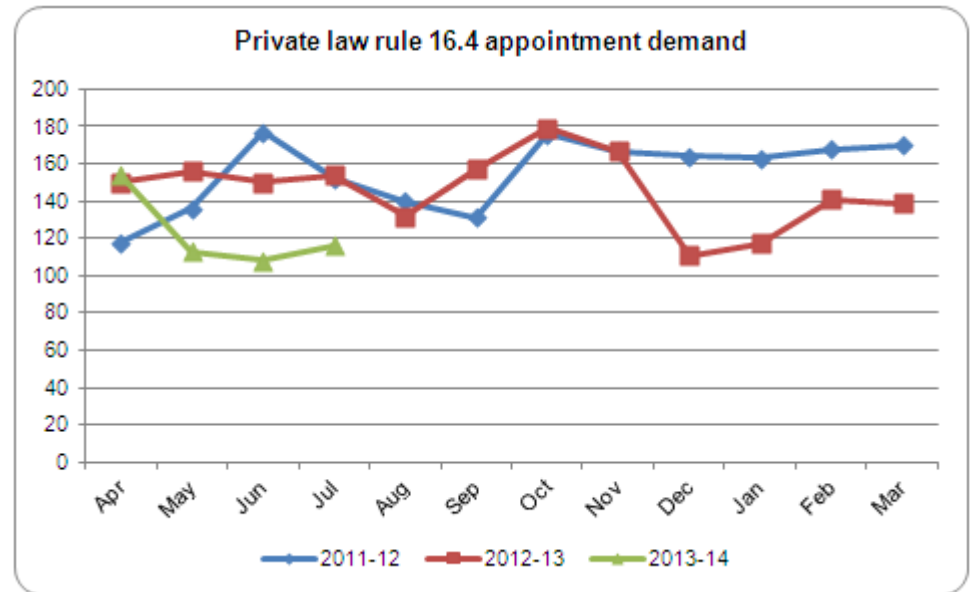

2011-12: In this year, Cafcass received 24,951 requests for section 7 reports, an increase of 4% (855) from the 24,096 received in the previous year.

2012-13: In this year, Cafcass received 23,662 requests for section 7 reports, a decrease of 5% (1,289) from the 24,951 received in the previous year.

2013-14 to date: Between April and July 2013, Cafcass received 9,019 requests for section 7 reports, an increase of 19% (1,432) from the 7,587 received in the same period last year.

Rule 16.4 appointments

As part of the new Family Procedure Rules 2010, which came into force from 6th April 2011, rule 9.5 appointments became known as rule 16.4 appointments, which may be made in complex cases, where the court decides that the subject child should be made party to the proceedings and represented by a children’s guardian and a solicitor.

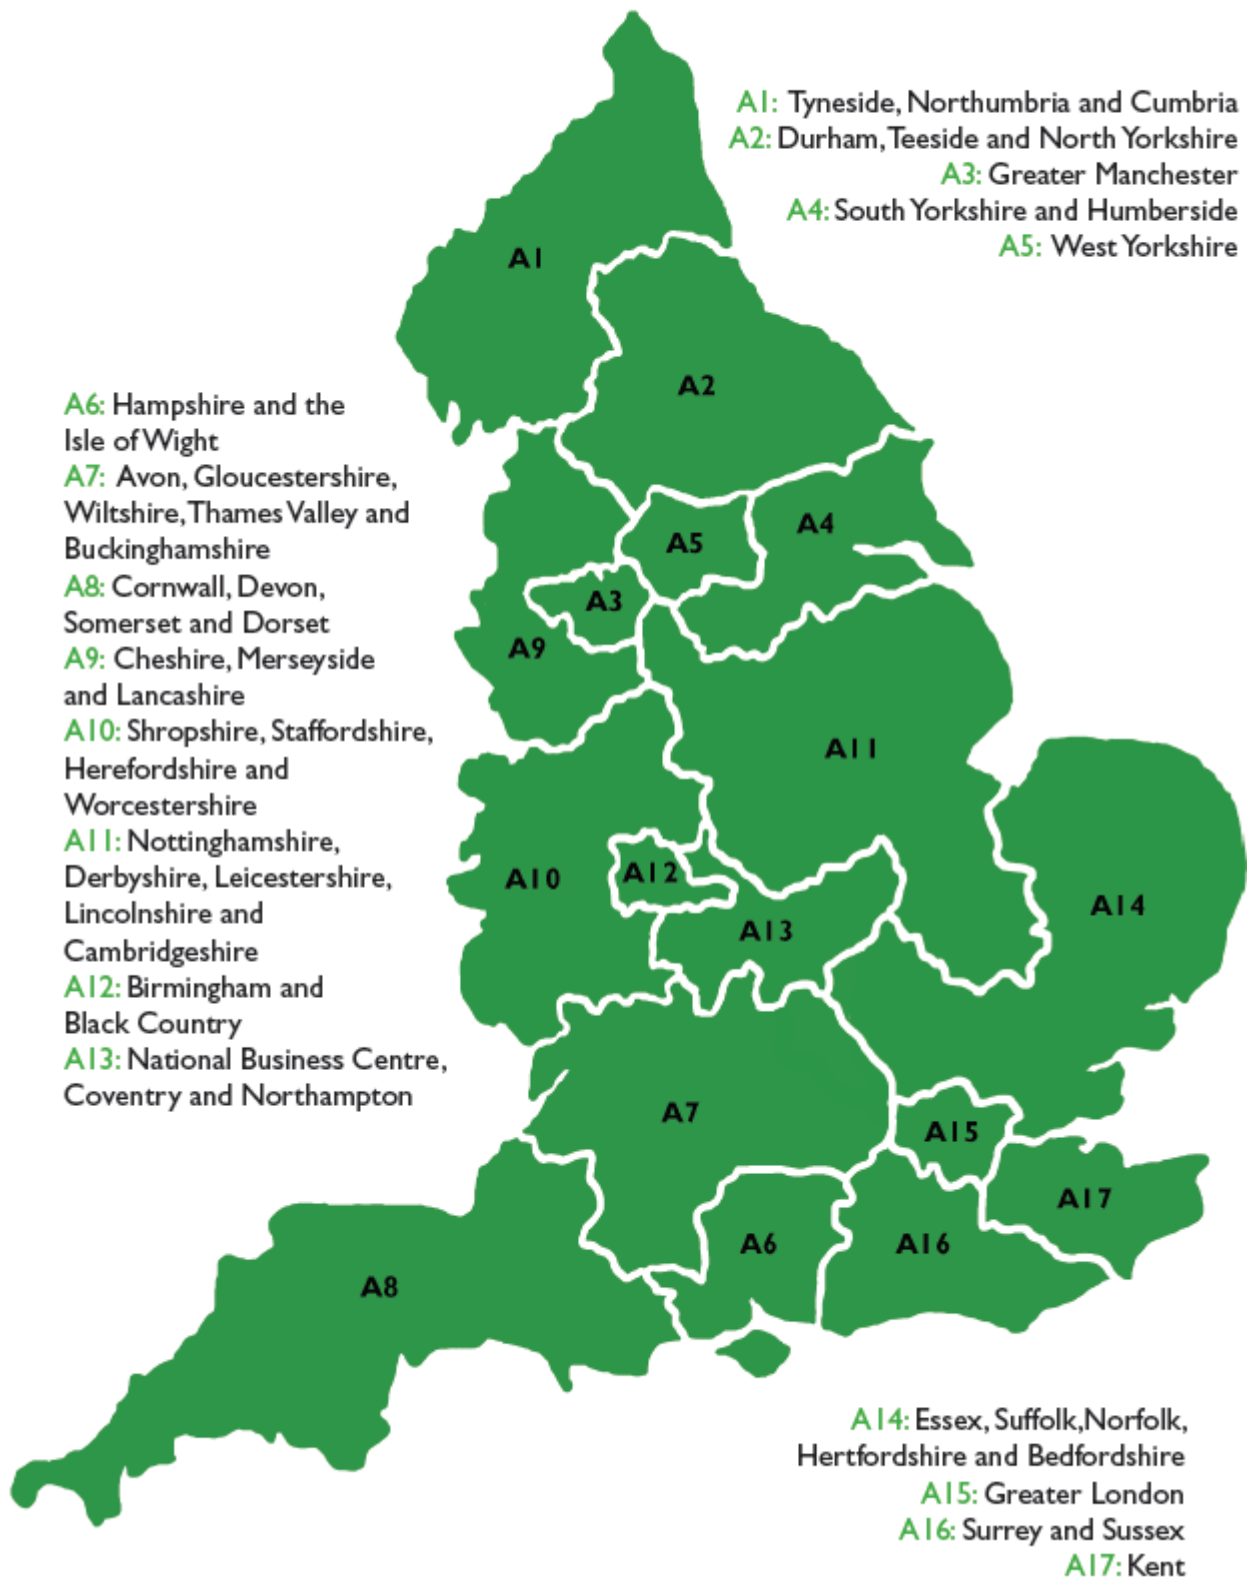

2011-12: In this year, Cafcass received 1,862 rule 16.4 appointments, an increase of 21% (326) from the 1,536 received in the previous year.

2012-13: In this year, Cafcass received 1,753 rule 16.4 appointments, a decrease of 6% (109) from the 1,862 received in the previous year.

2013-14 to date: Between April and July 2013, Cafcass received 491 rule 16.4 appointments, a decrease of 20% (119) compared to the same period last year.

ANNEX 1 – Cafcass service area map

Cafcass Service Area Map

ANNEX 2 – Cafcass case status and stage definitions

Case Status

Unallocated – This category should only comprise brand new cases.

Duty allocated – This category comprises where we will both react to incoming information and also will take pro-active steps at appropriate points in time to review the status, needs and level of priority of the case.

Allocated – (substantive or fully allocated) cases where the named worker will both react to incoming information and take appropriate pro-active steps and, in addition, will undertake the work that is set out in the case plan, and also in accordance with the courts' requests/directions. A substantive allocation includes the production of the case plan and any required reports for the case. A substantive allocation is also allocation to an appointment of Children's Guardian by the court in s31 care, supervision and other relevant Public Law cases.

Case Stages

Private law

Stage 1 – 'work to first hearing' (WTFH)

Stage 2 – 'work after first hearing' (WAFH) but where no report (further work) has been ordered.

- **2a** – outstanding safeguarding checks and/or hearings
- **2b** – all safeguarding checks received and no outstanding hearings

Stage 3 – Post-first hearing private law cases where further work/reports have been requested

- **3a** – report is due in more than 10 weeks
- **3b** – report is due in less than 10 weeks
- **3c** – report is overdue

Stage 4 – post-first hearing private law cases where further work/reports have been requested, and where all reports have been filed.

- **4a** – outstanding hearings.
- **4b** – no outstanding hearings. These will be cases awaiting the outcome and where the need for active work has ended.

Public law (care)

Stage 1 – pre-CMC hearing public law care cases. 45 calendar days from application date will be used as a proxy as not all CMC hearings are currently being added.

Stage 2 – post CMC hearing (45 calendar days) but pre-final hearing and/or final legal output (outcome)

- **2a** – 45 calendar days to 29 weeks
- **2b** – 30 weeks to 49 weeks
- **2c** – 50 weeks to 79 weeks
- **2d** – 80 weeks or more

Stage 3 – past final hearing and/or final legal output (outcome) entered in CMS. These will be cases awaiting final legal output (outcome) and/or administrative closure.

- **3a** – less than 4 weeks from last hearing entered in CMS
- **3b** – more than 4 weeks from last hearing entered in CMS

Public law (non-care)

Stage 2 – Pre-final hearing and/or final legal output (outcome)

- **2a** – 0 calendar days to 29 weeks
- **2b** – 30 weeks to 49 weeks
- **2c** – 50 weeks or more

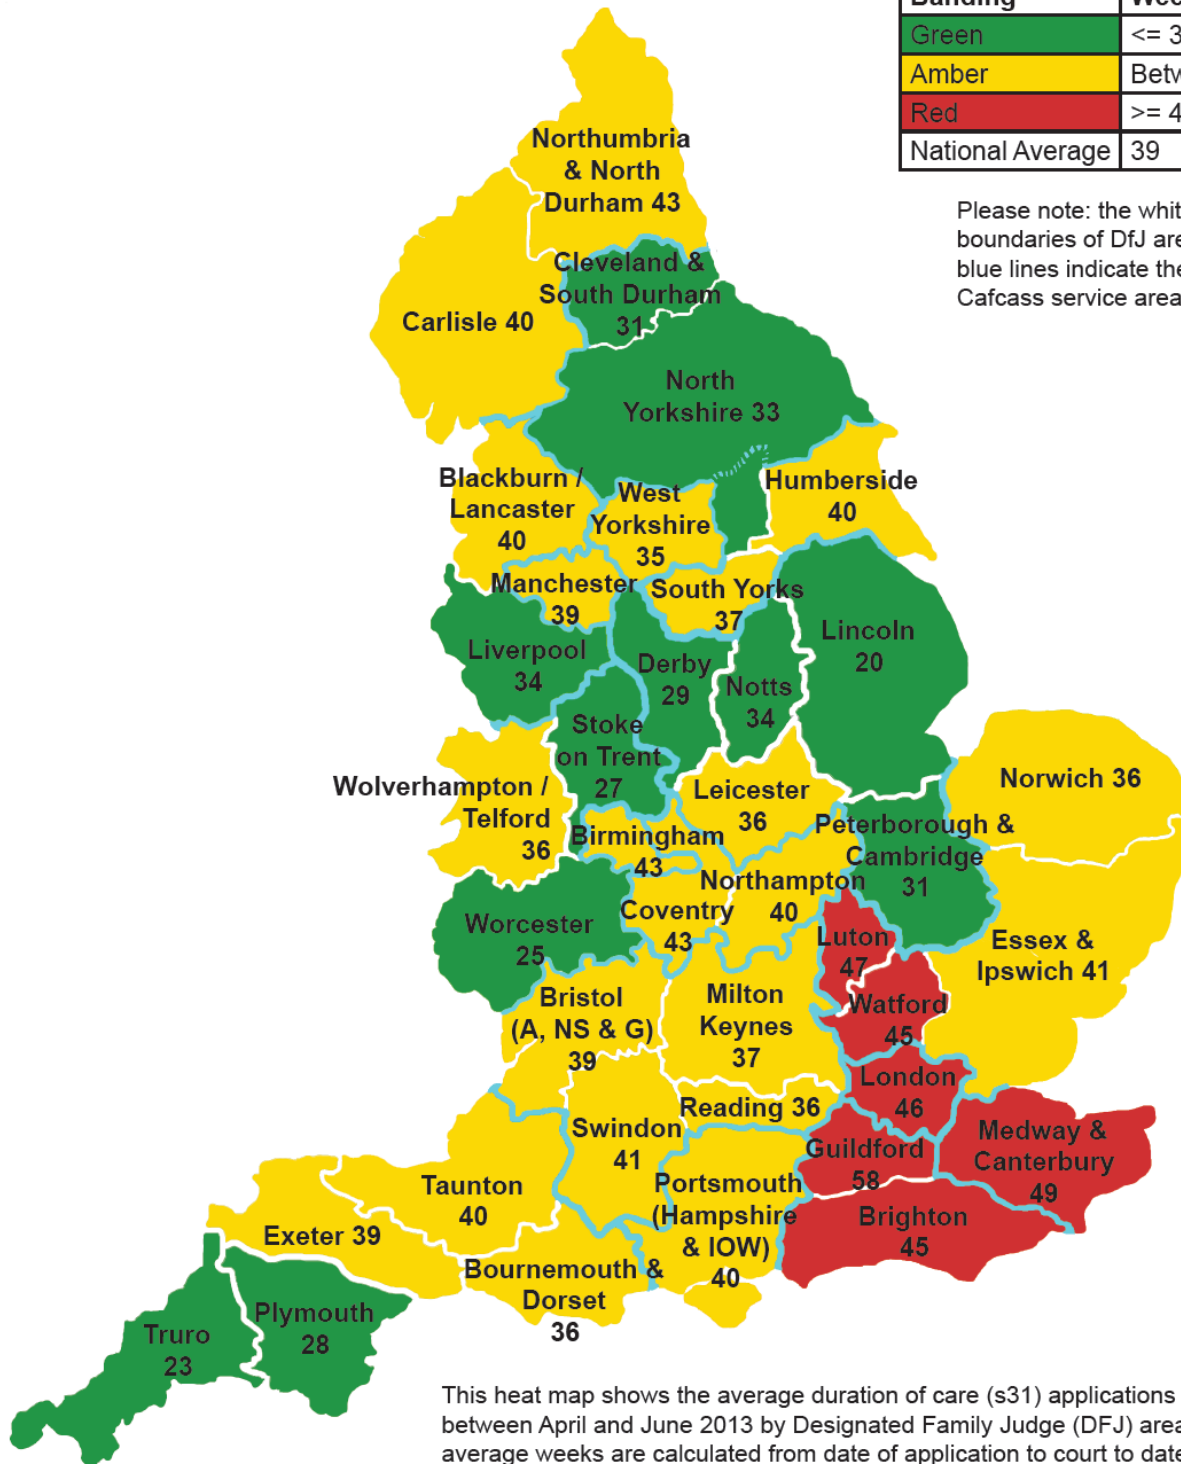

Stage 3 – past final hearing and/or final legal output (outcome) entered in CMS. These will be cases awaiting final legal output (outcome) and/or administrative closure.

- **3a** – less than 4 weeks from last hearing entered in CMS
- **3b** – more than 4 weeks from last hearing entered in CMS

Care (s31) Application Duration April - June 2013

Banding	Weeks
Green	<= 34
Amber	Between 35 and 43
Red	>= 44
National Average	39

Please note: the white lines indicate boundaries of DfJ areas, and the blue lines indicate the boundaries of Cafcass service areas.

This heat map shows the average duration of care (s31) applications closed between April and June 2013 by Designated Family Judge (DFJ) area. The average weeks are calculated from date of application to court to date application completed as recorded in the Cafcass Case Management System (CMS).

The red / amber / green bandings are specific to the national average and will vary with each production of this document. CMS is a live system and any late entries will be accounted for at the time of release of subsequent updates to this data.

Cafcass care application average duration in weeks

Duration is measured in weeks from application issue date to the date the application was completed

Care (s31) application duration in weeks by DFJ in weeks

Lowest to highest duration based on latest quarter

Data is taken from the Cafcass Case Management System (CMS), a live and continually updated national database. Each application can involve multiple children. The red, amber and green targets are specific to the national average for each quarter/year.

CMS is a live system and any late entries will be accounted for at the time of release of subsequent updates to this data. Overall trend for public law care application duration is downwards. The latest data show the care application closed between April and June 2013 took on average 39 weeks to conclude which shows that overall care duration has reduced by 12 weeks when compared to the same period last year. Of the total 40 DfJ areas, 19 (47%) have care duration below and 21 (53%) have care duration above national average.

ANNEX 4 – Care application demand and rates per 10,000 children

Notes:

1. Figures in the above table and graph are provided from the Cafcass national case management system (CMS) and the ONS. The units of measurement are a) care applications, upon receipt from the Court and entry into CMS by Cafcass and b) the child population (0 - 17) as estimated by ONS based on 2011 census information.
2. The calculated figures are multiplied by 10,000 to obtain tangible units and therefore represent the applications per 10,000 child population.
3. Child population figures are provided by Local Authority and have been repackaged geographically into Cafcass service area.
4. CMS is a live system and any late entries will be accounted for at the time of release of subsequent updates to this data.
